

2007
GUIDELINES FOR THE SIX COUNTY
REGIONAL REVIEW COMMITTEE

1. The Six County CDBG allocation is distributed to the counties on the same basis as the State Department of Community and Culture distributes the state allocation to the regions.

The Six County AOG's applied for and approved amount for administration of the CDBG program, not to exceed 15% of the total Six County allocation, is subtracted from the Six County total. The remaining amount is allocated to each county with each county receiving a base amount of \$30,000. After the base amount is subtracted the remainder of the allocation is then divided by the total Six County population to determine a per capita amount. The allocation balance is then distributed to each county by population using the per capita amount as the basis of distribution.

2. If two or more projects are submitted from a county, city, or town, the projects must be prioritized by that entity for the RRC to determine allocation of project funding. Projects will be rated and ranked against other projects within their county only.

3. Any funds remaining in a county allocation, after that county's rating and ranking has been completed and allocations have been awarded, will be combined and allocated to the next highest ranking project regardless of location.

4. The proposed project must be on the entity's current Capital Improvement List, filed in the Six County Consolidated Plan. A project not listed in the Consolidated Plan will not be considered for funding unless it is determined to be an emergency project.

5. Applicants must provide documentation (written proof) of secured dollar contributions and other funding sources contacted. (#9 & 12)

6. CDBG funds should be directed toward projects which will result in the most funds being leveraged from other sources. (#12)

7. Priority is given to jurisdictions that are closest to the maximum tax rates allowed by law. The current tax rate will be compared to the applicant's highest possible tax rate to determine the percentage. (#8)

8. Multi-year projects will be considered and the amount of funding to be awarded out of each successive year's funding will be determined by the RRC, with a maximum of three years for any multi-year project.

9. Project maturity will be considered in determining the awarding of funds for the present year's funding cycle, i.e., project can be completed in allotted time frame, matching funds in place, detailed scope of work, engineer's cost estimates in place, etc.

10. Attendance at an application workshop is required. Entities who do not attend will not be

eligible to apply. At least one, preferably two, representatives must be present at the workshop. The project manager is required to be in attendance and the chief elected official or an elected official that will oversee the project should be the other representative. Attendees other than those indicated must be officially designated by the entity they are representing and provide evidence of that designation at the time of the workshop.

11. Pre-applications must be received by 5:00 PM on Friday, December 1, 2006. Any applications received after this date and time will not be considered for funding.
